22. March 2016

FuturICT 2.0

FLAG-ERA Joint Transnational Call 2016

Letter of Support

To whom it may concern,

I am writing to give support from Center of Excellence for Complex Systems Research Warsaw University of Technology for the FuturICT2.0 proposal to be submitted to the Flag-Era Joint Transnational Call 2016.

Warsaw University of Technology has, since its inception, become an international hub in ICT research, business and study. In particular the work of the Center of Excellence for Complex Systems Research acting at Faculty of Physics in supporting the FuturICT 2.0 proposal reflects the University-wide support of the initiative, which we see as an important contribution to fields of ICT and Social Science. Our University has a strong reputation nationwide and in Europe for effective business-academic engagement.

This commitment is reflected by a number of EU projects lead in our Center (e.g., CyberEMOTIONS (www.cyberemotions.eu), SOPHOCLES (www.sophocles.eu), RENOIR (<http://renoirproject.eu>)) each providing broad and sustained communities of practice which may be used for the scientific and development outputs of the FuturICT2.0 project.

The commitment of the University as a whole is assured in the future three years of the project, through development of collaborative projects as integrated part of the FuturICT 2.0 activities.

Warsaw University of Technology is fully supportive of this project and confirms its interest in continued collaboration in this area of research which aims to address real world problems, and to engage new/diverse communities, through simulation technologies, high level visualization and innovative ICT participatory applications.

Yours sincerely

Prof. Dr. Janusz Hołyst

Leader of Centre of Excellence for Complex Systems Research
Chairman of *National Council of EU Research Projects Coordinators*
Past Chairman of Section of *Physics in Economy and Social Sciences* of *Polish Physical Society*
