## **Re: Visualization – a decision tool for sustainable development**

Mistra, The Swedish Foundation for Strategic Environmental Research, do commit itself to discuss the pre-proposal of a future project in the EU Future ICT with the Centre of Climate Science and Policy Research, Linköping University, Sweden.

Mistra has during 2010 visit the Visualization and Interaction Studio in Norrköping, Sweden and met the director Björn-Ola Linnér and his research team of the Centre for Climate Science and Policy Research. The Centre is a joint venture between Linköping University and the Swedish Meteorological and Hydrological Institute, SMHI.

Mistra is a foundation and is currently funding about fifteen research programmes in the area of sustainable development and strategic environmental issues. We would especially like to mention the climate policy programme Clipore. See [www.mistra.org](http://www.mistra.org)
